## AND THE RAIN CAME

The 2025 growing season will no doubt be remembered for the frequent and plentiful rains received. With a planting season divided into three – or more – segments, harvest may be a challenge when considering dry down and mid-field water hazards yet to be discovered. Knowing these challenges remain, **remember to call The Roland L. Geyer Agency as soon as you identify any loss when you begin harvest.**

To get the best results from your crop insurance coverage, let the team at The Geyer Agency know about any potential loss *immediately*. We will then go to work for you for the best outcome for any claim. We document your reports quickly and accurately to ensure the best possible action on your crop insurance claims.

**Will you be cutting silage? If so, let us know right away to be prepared in the event of a claim as this process differs from standard harvest procedures.**

### Silage Claim Requirements

Paperwork for a claim on corn harvested for silage must be signed and on file **before** a field is started.

The adjuster will visit with you **before** you may start harvesting. They will also be involved in the decision as to where and what size strips should be left for appraisal.

**Think you have a claim? CALL US at The Geyer Agency before harvesting.**

**Make it a habit to stay in touch with The Geyer Agency during harvest.** In the event of a claim, documentation and communication will be essential for each stage in the process. You may need to leave sample strips standing in the field for examination by an adjuster. In larger fields, sample strips may need to be left in several locations.

**If any of your crop is damaged to the extent you do not expect to care for or harvest any of it, report it as soon as possible as well.** Damaged crop acreage must be left intact until inspected before using it for anything else.

If a loss is probable, but you will be able to harvest, you must give notice of that loss at least 15 days before beginning harvest. If probable loss is not determined until fewer than 15 days before harvest, give notice immediately and leave a representative sample in

the field. This sample must remain intact for 15 days from the date of notice, unless you receive written notice to harvest.

If a loss is claimed after harvest, you must give written notice no later than 10 days after the earliest of these:

- 1. Harvest completion date**
- OR**
- 2. Calendar date for the end of the insurance period**

Your loss claim may be rejected if reporting requirements are not met. If you have any questions, please contact The Geyer Agency and we will help you any way we can.

## 2024 CROP STORED ON YOUR FARM?

If any of last year's crop remains in storage on your farm, call **The Geyer Agency before harvest begins this fall**. An adjuster will need to measure any old crop stored on your farm to alleviate any issues with 2025 harvest results. Call us to arrange for measurement soon!

## LOOK FOR REVENUE COVERAGE PRICING IN OCTOBER

Revenue coverage price per bushel is set annually in October. Please check our website, [www.geyeragency.com](http://www.geyeragency.com), where we will post the price when available. If yields are short, the price set in October will determine if revenue coverage makes a fair difference on bushel guarantees. We are happy to provide details on your coverage.

## SHARE YIELD RESULTS IMMEDIATELY

Make it part of your post-harvest routine to report your yields to The Geyer Agency as soon as possible. Crop yield reporting includes being prepared to explain how you arrived at your totals in the event of spot-checking. This includes keeping records and reporting production for each unit separately. Remember, if 50% or more of the corn from any unit is cut for silage, stored as high moisture grain, or used as ground ear corn, you can get a free appraisal. If you are not going to harvest corn by one of those methods, you can get an appraisal for a fee. Contact us for details. Then report your results right away! Thank you!

PO Box 129  
Sac City, IA 50583-0129

## MORE EXPERIENCE. MORE KNOWLEDGE.

At The Geyer Agency, we have one focus – crop insurance. We offer unequalled experience and connections in the crop insurance industry. Staying current with industry changes gives us insight we will share with our customers, so you benefit from potential savings, coverage, and new opportunities. We're monitoring proposed changes, encouraged by some positive shifts, and will be happy to share with you!

## Coverage Requires Accurate Information TELL THE GEYER AGENCY ABOUT CHANGES TO YOUR FARM BUSINESS

For the best coverage and service, please let The Roland L. Geyer Agency know as soon as possible if any of these changes have occurred for you:

- Marital status
- Additional acres farmed
- New rental agreements
- New business entities
- Bringing new generations into business
- Farming in new counties

Changes to either your personal status or your farm business will impact your crop insurance policies. Thank you for taking the time to report changes to your farm business to Tod or Phil!

## INSURING LIVELIHOODS FOR 67 YEARS
