### Finished Planting? Time to Report!

There's a rhythm to every spring season. Prepare, plant, report. As soon as you are finished planting, bring your acreage and planting report to the FSA office and then to us at [The Geyer Agency](#) for your crop insurance coverage. Timely reporting of this information is essential for your coverage to be in effect.

We recommend the following:

1. **Certify your acres at the county FSA office.**
2. Bring your certification paperwork to The Roland L. Geyer Agency.
3. Rest assured you receive the best possible coverage from the crop insurance agency you know and trust!

It is essential the acreage and planting dates you report to the FSA office should be identical to what you give us for your crop insurance coverage. In the event of a claim, having the same information in both cases will speed up processing.

Reporting ahead of the July 15, 2015, deadline is essential for crop insurance coverage to be in effect. The potential for storms also places some urgency on the process. If a damaging storm would occur, having your information submitted soon after you finish planting will improve the claims process.

As always, [The Geyer Agency](#) will work with you to be sure all the required reporting and documentation is completed on time to be sure your coverage is fully in effect as expected.

**If you have any changes in your farming enterprise, please notify us of those as soon as possible.**

Remember, your deadline for certification with the Farm Service Agency (FSA) is the same as for crop insurance. This year, that's July 15, 2015. Our location in the same building as the FSA office makes this process as easy as possible for you!

We appreciate your business and will always do our best to serve your crop insurance needs well!

### Wind or Hail Damage? Call The Geyer Agency

If your 2015 crop is damaged by any weather-related event, make [The Roland L. Geyer Agency](#) your first call. We will go to work for you to set the process in motion for you to receive a settlement should damage exceed the established threshold of your policy.

It can be hard to know if damage occurred in the midst of a section so re-inspection is always available. If you see suspected damage while harvesting, you have the opportunity to have adjusters come out and inspect your crop.

**Leave sample strips for re-inspection standing in the field where you see the damage.**

If you do find weather-related damage later in the growing season, rest assured company representatives are willing to conduct re-inspections. In larger fields, sample strips need to be left in several locations.

Whether in season or during harvest, call us if you suspect hail damage. We will go to work for you to attain the best possible settlement. And don't forget to leave sample strips in the fall.

## Call Us Before Replanting

Another promising spring season is flying by. Each year, we know there's a risk of weather creating the need for replanting. If you do discover the need to replant any part of your crop, contact [The Roland L. Geyer Agency](#) **immediately!** This is an essential first step in the process.

After contacting us and before you replant, it is important to leave a few strips in the affected field so an adjuster can evaluate them. This simple but essential step results in the best outcome on your replanting claim.

We want you to receive the maximum benefit of your crop insurance coverage and that means we need you to **contact us before you begin** any replanting activities.

Call us immediately if you need to replant any portion of your total acres. And if it's after hours, you can reach Tod at home by calling 712-273-5415 or Phil at 712-636-4552.

## Risk Management Tool

Crop insurance can be one of your most essential risk management tools. Used appropriately, it will help ensure your profitability and livelihood. Crop insurance coverage should be part of your grain marketing plan as one of your risk management opportunities.

The guarantees with your crop insurance coverage will enable you to forward contract grain production with confidence. If you need help determining how much you should forward contract, come see us.

Ask at [The Roland L. Geyer Agency](#) about how you can make the most of your coverage.

## Discount Triple Check

Discounts on crop insurance coverage used to be the norm and while now more rare, may still be available. We always put our customers first, working for you to verify all appropriate credits and discounts are applied to your policies. We check all documents, including your invoice before you see it, to be sure you're getting the discounts you are entitled to receive.
